THE MEDICAL
RESEARCH ENGINE
OF THE FUTURE

ResearchLink

The Medical "research" engine of the Future

RESEARCHLINK

No more clumsy desk manuals and reference books.

Best practice treatment protocols for the 300 most common work-related injuries are compiled in one easy-to-use resource.

ResearchLink includes:

- Expected disability duration by clinical factor
- Physical therapy Best Practice treatment guidelines
- Best Practice chiropractic treatment guidelines
 - Drug information related to work injuries
 - Alternate job (light duty) advice

Finally. A convenient and easy-to-use medical resource for workers' compensation injuries edited by experts in the medical field. It's almost like having a medical consultant on your staff without paying a salary.

Quickly and easily find out the severity of your workers' injuries. Recognize the average return-to-work times and expected return-to-work factors by

injury type. Understand the level of risk involved, and identify the indications of excessive medical costs and fraud.

THE BENEFITS OF USING RESEARCHLINK

- Easy to use, internet-based search engine
- Convenient, related medical topics
- Manage the care of injured workers more effectively
- Materials can be copied and electronically communicated
- Identify those claims that are problematic to resolve

FINALLY.
A convenient and easy-to-use medical resource for workers' compensation injuries edited by experts in the medical field.

Expert medical information at your fingertips:

Find out the severity and duration of work-related injuries and recognize the methods to curb the associated costs.
